Overview

Industrial Emergency Stop Solution

The LAY5-ET42 mushroom head emergency stop switch is engineered for high-reliability industrial control circuits. Featuring a robust zinc alloy and anti-flame plastic construction, it ensures durability in demanding environments. This switch utilizes special silver alloy contacts to minimize electrical erosion, making it an ideal choice for emergency shutdown systems in distribution cabinets, power stations, and machinery control panels.

Electrical Specifications

Specializing in production of buttons and indicators since 1997

High-visibility emergency stop switch with robust construction for industrial safety.

Key Electrical Ratings

600 V

Rated Insulation Voltage

10 A

Heating Current

50 M Ω

Insulation Resistance

Contact Resistance

d25 Ω

Mechanical Specifications

LAY5-ET42

Emergency stop
Push-pull

N/C

Red $\Phi 40$ LAY5-ET42

Detailed dimensional drawing including mounting hole diameter and head size.

Mounting Dimensions

Dimension Type	Value
Mounting Hole Diameter	22mm (M22)
Mushroom Head Diameter	40mm
Total Height	43mm

Mechanical Life 1000000 cycles

Electrical Life 500000 cycles

Certifications & Compliance

Standards & Certifications

CE • IEC60947-5-1 • ISO9001 • RoHS

Product Features

Typical Applications

- Distribution Boxes
- Distribution Cabinets
- Control Cabinets
- Power Stations
- Communication Networks

Contact Configuration Normally Closed (NC)
