

Nantes-Pays de Loire Citadis-Dualis 3D Rendering

High-resolution 3D rendering of the Nantes-Pays de Loire Citadis-Dualis tram. The sleek exterior and advanced rail transit engineering are clearly depicted, set on a section of track to emphasize its operational context.

Product Overview

Nantes-Pays de Loire Citadis-Dualis Rendering

This high-resolution 3D rendering showcases the Citadis-Dualis tram model designed for the Nantes-Pays de Loire region. It provides a detailed visual representation of the tram's modern exterior, aerodynamic styling, and rail integration capabilities. This asset is ideal for technical documentation, infrastructure planning, and professional rail transit presentations.
