

Narrow Gauge Railway Bogie for Namibia

This narrow gauge railway bogie is designed for use in Namibia. It features a robust steel frame and durable wheels for reliable performance on narrow gauge tracks, ensuring safe and efficient transport of goods and passengers.

Overview

Narrow Gauge Railway Bogie

This narrow gauge railway bogie is engineered specifically for reliable performance on specialized track systems in Namibia. It features a robust steel frame construction and an advanced suspension system with coil springs to ensure stability and smooth operation. Designed for both industrial and commercial railway applications, it provides a safe and efficient solution for the transport of goods and passengers.

Technical Specifications

Design Features	Narrow Gauge, Steel Frame, Coil Spring Suspension
Application	Industrial and Commercial Railway
