

Narrow Turbo Diamond Saw Blade

This narrow turbo blade is designed for cutting various materials. It is available in sizes ranging from 105mm to 350mm and features a segmented rim and cooling holes.

Product Overview

High-Performance Narrow Turbo Blade

This professional-grade narrow turbo diamond saw blade is engineered for precision cutting in demanding environments. Featuring a specially designed fine turbo segment and a mature bond system, it delivers extremely fast and smooth cutting performance. It is an ideal solution for granite and marble applications, balancing high cutting speed with extended blade durability.

Country of Origin	Thailand
