

# Natural Sisal Fiber for Abrasive Applications

Sisal fiber is a natural fiber known for its strength and durability. It is suitable for polishing, buffing, and scrubbing applications.

## ADDITIONAL IMAGES

## Product Overview

### Natural Sisal Fiber Overview

Sisal fiber is a premium, naturally extracted material renowned for its exceptional strength, flexibility, and fine texture. It is a highly sustainable, biodegradable solution widely utilized in industrial abrasive applications such as manufacturing buffing wheels and polishing tools. Its inherent resistance to moisture, wear, and corrosion ensures reliable performance in demanding environments.

## Material Properties

### Material Characteristics

Biodegradable, Waterproof, Wear-resistant, Anti-corrosion, Flexible

## Industrial Applications

### Primary Applications

- Buffing and polishing wheels
- Industrial abrasive tools
- Ropes and twines
- Composite material reinforcement
- Environmental protection supplies

## Technical Specifications

### Performance Metrics

**1 Biodegradable**

Environmental Impact
