

Needle-Nose Pliers for Precision Work

These needle-nose pliers are designed for precision work in tight spaces. Their features include a spring-loaded mechanism for ease of use and durable construction for long-lasting performance.

Product Overview

Precision Needle-Nose Pliers

These needle-nose pliers are engineered specifically for precision tasks in tight and restricted spaces. Featuring an ergonomic handle design and a spring-loaded mechanism, they provide superior comfort and ease of use for extended periods. Their durable construction ensures reliability, making them an essential tool for intricate work in electrical, electronic, and jewelry assembly.

Key Features

Design Features

- Ergonomic handle design for comfort
- Spring-loaded mechanism for reduced hand fatigue
- Durable construction for long-lasting performance

Applications

Primary Applications

Electrical, Electronics, Jewelry Making, Wire Bending, Wire Cutting

Functionality

Core Functions

Gripping • Bending • Cutting
