

NEMA 1-15P UnGrounded Power Cords

NEMA 1-15P power cords utilize an ungrounded two-prong plug for North American electrical systems. These cords are typically rated for 125V and 15A, suiting them for low-power devices.

Product Overview

NEMA 1-15P Power Cords

These NEMA 1-15P power cords are designed for North American electrical applications, featuring an ungrounded two-prong plug configuration. Built to rigorous safety standards, they are rated for 125V and up to 15A, making them suitable for a variety of small appliances, lamps, and clocks. The cords offer versatile customization options for cable length and type, ensuring compatibility with diverse indoor power requirements.
