

# NEMA Vibration-Proof Electric Motor

This NEMA standard electric motor is designed for vibration-proof operation. It features robust construction and is suitable for various industrial applications where vibration is a concern.

## ADDITIONAL IMAGES

## Product Overview

### Reliable NEMA Vibration-Proof Performance

This series of NEMA vibration-proof electric motors is engineered for demanding industrial applications requiring consistent, stable operation. Built with 100% copper wire windings for durability, these motors are designed to withstand vibration and ensure a long service life. They are widely utilized in HVAC&R systems and various industrial environments, offering efficient performance and reliable output.

## Technical Specifications

### Available Motor Series

| Series                             | Frame Size | Power Range (kW) |
|------------------------------------|------------|------------------|
| SBD (Single Phase Vibration-Proof) | 56         | 0.37 - 1.0       |
| ZS (Two Speed Vibration-Proof)     | 56         | 0.06 - 0.55      |
| SBW (General Purpose Three Phase)  | 56         | 0.25 - 1.1       |

### Construction Materials

100% Copper Wire, Rigid Mounting Base, Sealed Bearings

## Compliance & Quality

### Certifications

CCC • CE • ISO 9001:2015 • GB/T 19001-2006
