

Neoprene Marine Safety Floatation Suit

This marine safety suit is constructed from 5mm thick neoprene. It incorporates a buoyancy pillow, removing the necessity for an additional lifejacket.

Product Overview

Professional Marine Safety Solutions

This Neoprene Marine Safety Floatation Suit is engineered for high-stakes maritime environments, providing essential buoyancy and thermal protection. Designed for durability and emergency readiness, it features high-visibility materials and ergonomic construction to ensure safety during critical operations. Ideal for commercial vessels and offshore safety requirements.
