

Nesting Aluminum Trays

Set of three nesting rectangular aluminum trays, varying in size, suitable for a range of applications. Constructed from durable aluminum, these trays are designed for longevity and ease of cleaning.

Product Overview

Versatile Nesting Design

These rectangular aluminum trays are engineered for durability and ease of maintenance in professional environments. The set of three nesting units offers space-saving storage and adaptability for various industrial or commercial tasks. Designed with slightly raised edges, they ensure secure transport and containment of items.
