

Network Communication Hub with LED Indicators

This network communication device facilitates data transmission and network communication. It features multiple indicator LEDs for monitoring connectivity status.

Overview

Compact Network Communication Hub

This network communication device is a robust, desktop-sized solution engineered for reliable data transmission in small to medium-sized network environments. Featuring a comprehensive suite of LED indicators, it allows for real-time monitoring of connectivity and channel status. Its intuitive design includes a dedicated power switch and reset functionality, ensuring ease of use and efficient network management.

Technical Specifications

Key Features

- Integrated Power Switch
- Manual Reset Button
- Multi-Channel LED Status Monitoring
- Compact Desktop Form Factor

Primary Application

Data Transmission • Network Communication

Model Number

SED-8624

Connectivity Indicators

CH1, CH2, CH3, CH4, EP, TS, RX, LINK, FL2, COM, CDA, VC-LINK
