Overview

Professional Network Infrastructure Solution

This robust network equipment cabinet is engineered for the secure and organized housing of critical IT infrastructure, including servers, switches, and routers. Designed for data centers, server rooms, and office environments, it features a sturdy frame, lockable doors for enhanced security, and optimized ventilation to ensure efficient thermal management. With adjustable mounting rails and integrated cable management, this 19-inch rack-mountable solution provides the flexibility and durability required for demanding professional deployments.

Key Features

Core Features

Lockable Security, Thermal Management, Adjustable Mounting Rails, Cable Management, Casters Included, 19-inch Rack Mountable
