

Network Interface Controller

This network interface controller enables efficient data transfer within a computer. It provides a stable connection for networking applications.

Product Overview

High-Performance Network Interface Controller

This Network Interface Controller is engineered for robust data communication and seamless connectivity in demanding environments. Designed with precision and reliability in mind, it features a comprehensive layout that ensures efficient port management and stable signal transmission. This device serves as a critical component for professional networking infrastructures requiring consistent performance and technical accuracy.

Technical Specifications

Reference Dimensions

Reference Point	Value
Ref. 1100	1100
Ref. 140	140
Ref. 150	150
Ref. 210	210
Ref. 40	40

Device Category

Network Communication • Interface Controller
