

Network Switch

This network switch enables connectivity between multiple devices on a network. It is suitable for home or small office environments.

Overview

High-Performance Network Connectivity

This network communication device is engineered to provide reliable connectivity for home and small office environments. Featuring a compact design with a perforated surface for optimal thermal management, it ensures stable performance during continuous operation. The front panel includes clear indicator lights for real-time status monitoring, making it an essential hub for efficient network management.

Technical Specifications

Recommended Use

Home Office • Small Office

Model Number	EHA-1062
Device Type	Network Switch / Communication Hub
Design Features	Compact, Perforated Cooling Surface, LED Status Indicators
