

# Neurological Reflex Hammer for Tendon Percussion

This precision-engineered reflex hammer is designed for neurological examinations. Its balanced weight distribution and ergonomic handle ensure accurate and consistent percussion.

## Product Overview

### Clinical Precision Instrument

This precision-engineered reflex hammer is specifically designed for neurological examinations and tendon percussion. Featuring a balanced weight distribution and an ergonomic handle, it ensures accurate, consistent percussion for reliable reflex testing. Its durable construction and high-quality materials are built to withstand the demands of daily clinical settings.

## Technical Specifications

### Performance Highlights

**1 precision**

Tapered Head Design

<b>Primary Application</b>	Neurological examinations and tendon percussion
<b>Key Design Features</b>	Balanced weight distribution, Ergonomic handle, Tapered head

## Compliance & Quality

### Construction Quality

Clinical Grade • Durable Construction
