

Ni-MH AA Rechargeable Batteries

These Ni-MH AA batteries combine the benefits of alkaline and rechargeable technologies. They are pre-charged and ready to use, retaining 85% of their power even after storage.

Product Overview

High-Performance Ni-MH AA Batteries

These nickel-metal hydride (Ni-MH) AA rechargeable batteries are engineered for consistent power delivery and extended operational lifespan. Designed to support a variety of electronic devices, they provide a sustainable and cost-effective energy alternative to single-use batteries. With multiple capacity options available, these cells are built with high-quality materials to ensure durability and reliable performance in demanding applications.

Technical Specifications

Battery Chemistry	Nickel-Metal Hydride (Ni-MH)
Nominal Voltage	1.2 V
Dimensions (Diameter x Height)	14.5mm x 50.4mm

Performance Data

Model Specifications

Model	Capacity	Std Charge	Weight
VH-AA1800H	1800 mAh	180mA (14 hrs)	28g
VH-AA1900H	1900 mAh	190mA (14 hrs)	28g
VH-AA2000H	2000 mAh	200mA (14 hrs)	28g
VH-AA2100H	2100 mAh	210mA (14 hrs)	N/A
