

Nickel-Cadmium Rechargeable Batteries

Nickel-cadmium (Ni-Cd) rechargeable batteries are available in cylindrical form factors. They come in capacities of 300mAh and 600mAh, both operating at 1.2V.

Product Overview

Reliable Power Solutions

These Nickel-Cadmium (Ni-Cd) rechargeable batteries are engineered for durability and consistent performance in demanding electronic applications. Designed with a cylindrical form factor, they offer robust cycle life, making them an ideal choice for devices that require frequent recharging. Available in multiple capacity configurations, these batteries provide a dependable power source for various professional and consumer electronics.

Technical Specifications

Available Capacities

- 300
- 600

Battery Chemistry	Nickel-Cadmium (Ni-Cd)
Nominal Voltage	1.2 V
Form Factor	Cylindrical (AA)
Key Features	Rechargeable, High Cycle Life, Durable Construction

Performance Metrics

Performance Metrics

1.2 V Voltage	300 mAh Low Capacity	600 mAh High Capacity
