

Nickel-Cadmium Rechargeable Battery

These are nickel-cadmium (Ni-Cd) rechargeable batteries with a voltage of 1.2V. They come in various sizes and capacities, including AA, C, SC, and D, suitable for a range of electronic devices and applications.

Overview

High-Performance Nickel-Cadmium Batteries

These Nickel-Cadmium (Ni-Cd) rechargeable batteries provide a reliable power solution for a wide range of electronic devices. Designed for durability and consistent performance, they are available in multiple standard sizes to accommodate various industrial and commercial applications. The assortment includes options for different capacity requirements, ensuring compatibility with diverse equipment needs.

Technical Specifications

Battery Chemistry	Nickel-Cadmium (Ni-Cd)
Nominal Voltage	1.2 V

Available Configurations

Available Capacities and Sizes

Size	Capacity	Unit
AA	1100	mAh
SC	2200	mAh
C	3000	mAh
D	6000	mAh

Features

Rechargeable	Yes
Supported Sizes	AA, SC, C, D
