

Nikasil Plated Engine Cylinder

This cylinder features Nikasil plating for enhanced durability and reduced friction. The finned structure is designed for optimal heat dissipation.

Product Overview

High-Performance Engine Cylinder

This precision-engineered cylinder is designed for high-performance chainsaw and brush cutter engines. Featuring advanced Nikasil plating, it offers superior wear resistance and reduced friction for extended operational lifespan. The unit includes a specialized black color treatment and a finned structure optimized for efficient heat dissipation under demanding industrial conditions.

Technical Specifications

Surface Treatment	Nikasil Plating
Finish Color	Black
Compatible Equipment	Chainsaw, Brush Cutter

Key Features

Performance Highlights

1 Enhanced
Wear Resistance

1 Optimized
Friction Reduction

Design Advantages

- Nikasil plating for durability
- Finned structure for heat dissipation
- Extended service life
- Precision-engineered for industrial applications
