

NiMH Battery Charger with Independent Charging Bays

This battery charger is designed for charging NiMH rechargeable batteries. It features four independent charging bays, allowing for simultaneous charging of multiple batteries.

Product Overview

Professional NiMH Charging Solution

This versatile battery charger is engineered for reliable, independent charging of NiMH rechargeable batteries. Featuring four distinct charging bays, it enables simultaneous power management for multiple cells, ensuring efficiency for high-demand equipment. Its compact design makes it an ideal solution for both stationary office use and portable field operations, while integrated LED indicators provide real-time status updates for each individual bay.

Technical Specifications

Status Indicators

LED Indicators • Independent Channel Monitoring

Independent Charging Bays	4 bays
Compatible Chemistry	NiMH

Usage & Application

Portability

- Compact form factor
- Suitable for travel
- Home or office use
