

Nitrile Coated Knit Work Gloves

These work gloves feature a nitrile coating for enhanced grip and durability. The seamless knit construction provides comfort and dexterity, making them suitable for a variety of tasks.

Product Overview

Professional Nitrile Coated Work Gloves

These nitrile coated knit work gloves are engineered to provide an optimal balance between hand protection and tactile sensitivity. The seamless knit liner ensures long-lasting comfort during extended wear, while the durable nitrile coating offers superior grip and resistance against abrasions and punctures. They serve as a versatile solution for professionals in construction, general maintenance, and various industrial applications.

Technical Specifications

Protective Properties

- Abrasion Resistance
- Puncture Resistance
- Enhanced Grip
- Tactile Sensitivity

Material Composition

Nitrile Coating, Seamless Knit Liner

Application Suitability

Ideal Applications

General Purpose Work • Construction • Maintenance
