

NiZn Rechargeable Battery Charger

This charger is designed for NiZn rechargeable batteries. It features multiple charging slots with indicator lights and is compatible with standard power inputs.

Product Overview

Intelligent Charging Solution

This versatile battery charger is designed to efficiently power 1-4 AA or AAA rechargeable batteries simultaneously. It features an integrated LCD display for real-time status monitoring and intelligent safety protocols to ensure reliable operation. With wide-range voltage compatibility, it is an ideal solution for maintaining your rechargeable battery inventory.

Technical Specifications

Input Voltage	AC 110-240V
Input Frequency	50-60Hz
Output Voltage	1.2 V
Output Current	500 mA

Features

Charging Capacity

4 slots

Max Channels

Safety & Display

- Intelligent safety protection
- LCD display status monitoring

Compatible Battery Types

NiMH, NiCD, NiZn
