Overview

Professional Non-Contact Measurement

This professional-grade non-contact digital infrared thermometer is engineered for accurate and rapid temperature monitoring. Designed with versatility in mind, it supports multiple measurement modes, including body temperature, room temperature, and surface temperatures for various objects. With a fast 1-second measurement time and a memory capacity for up to 99 readings, it is an essential tool for efficient health screening and environmental monitoring.

Technical Specifications

Measurement Range	43 °C
Error Margin	d±0.3℃
Measurement Time	1 second
Power Supply	DC 3V

Features

Key Features

- Non-contact measurement
- 99 memory groups
- Double mode high-temperature alarm
- Double color screen backlighting
- Medical-grade material construction

Compliance

Compliance Details

Metric	Details
Test Standard	EN 60601-1-2:2015
Test Result	PASS
Report Date	March 13, 2020

Certification Standards	EN 60601-1-2:2015, CE
