Overview

Professional Non-Contact Measurement

This non-contact infrared thermometer offers rapid, one-second temperature readings, ensuring a hygienic and convenient experience for both clinical and home settings. It features a versatile dual-mode design suitable for monitoring body temperature as well as surface temperatures of objects like food or milk. With an intuitive three-color fever alert system, users can instantly identify normal, slight fever, or high fever conditions.

Performance

Measurement Time	1 s
Measurement Distance	1-3 cm
