Product Overview

Professional Non-Contact Infrared Thermometer

This non-contact infrared thermometer offers a fast and hygienic solution for temperature monitoring, delivering results in just one second. Designed for versatility, it supports both body temperature measurement and object surface temperature detection. With features like a fever warning indicator and dual-scale support, it is an essential tool for accurate, efficient health and environment monitoring.

Performance Metrics

Measurement Speed

1 second

Measurement Time

0.2 °C

Accuracy

Forehead Measurement Range

32°C to 42.9°C

Recommended Distance

2 cm

Technical Specifications

Power Requirements

DC 3V (2x AAA batteries)

Auto Power Off

20 seconds

Measurement Modes

Body Temperature, Object Temperature

Supported Units

Celsius (°C), Fahrenheit (°F)

Environmental Conditions

Operating Conditions

Parameter	Range
Temperature	16°C to 35°C
Humidity	d 85%RH

Storage & Transport

Parameter	Range
Temperature	-20°C to 55°C
Humidity	d 93%RH

Features

Key Features

- Non-contact infrared technology
- High accuracy sensor
- Fever warning indicator (above 38°C)
- Built-in memory function
