Product Overview

Professional Non-Contact Temperature Monitoring

This non-contact infrared thermometer provides a hygienic and efficient solution for temperature screening, making it ideal for professional environments. Designed for forehead use, it eliminates the need for skin contact, significantly reducing the risk of cross-infection. The device features a rapid response time of under one second and an intuitive three-color LCD display for immediate status feedback, ensuring reliable and quick readings for users of all ages.

Measurement Performance

Temperature Range

32 °C Min Temperature	42.9 °C Max Temperature
---------------------------------	-----------------------------------

Allowable Error	d ±0.3°C
Measuring Distance	1cm - 3cm
Measurement Time	< 1 second

Technical Specifications

Power Supply	DC 3.0V
Memory Storage	32 groups
Automatic Shut-down	20 seconds

Physical Attributes

Dimensions (L*W*H)	138 x 95 x 40 mm
Net Weight	103 g

Features

Usage Type	Non-contact • Forehead measurement • Hygienic
Display Features	LCD Display, Three-color status indicator, °C/°F Switchable
