Overview

High-Efficiency Non-Fried Noodle Production

This automated production line is engineered for the large-scale manufacturing of non-fried instant noodles. The system features a continuous, integrated process flow encompassing dough mixing, sheeting, steaming, cutting, and multi-stage drying. Designed for durability and hygiene, the line utilizes stainless steel components and precise control systems to ensure consistent noodle texture, thickness, and moisture content.

Technical Specifications

Production Stages

- Dough mixing
- Sheeting
- Steaming
- Cutting and forming
- Drying
- Packaging

Operational Capabilities

- Continuous operation
- Adjustable noodle thickness
- Adjustable texture control
- Precise moisture content control

Construction Material

Stainless Steel
