

Non-Magnetic Stainless Steel Combination Wrench Set

This combination wrench set is made from non-magnetic 304 stainless steel. The wrenches are suitable for applications in medical, food, and other industries where magnetic interference is a concern.

Product Overview

Non-Magnetic 304 Stainless Steel Wrench Set

These non-magnetic combination wrenches are crafted from 304 stainless steel, offering superior corrosion resistance and durability in demanding environments. Designed for versatility, the set covers sizes from 7mm to 46mm, making it an essential tool for sectors where magnetic interference is a concern, such as medical, food processing, and electronics. Their robust construction ensures performance in extreme temperatures, ranging from -250°C to 600°C.

Technical Specifications

Material	304 Stainless Steel
Size Range	7-46mm
Technology	Precision casting
Packaging	Carton package

Performance Metrics

Thermal Resistance

600 °C Max Temperature	-250 °C Min Temperature
----------------------------------	-----------------------------------

Key Features

Non-magnetic, Corrosion resistant, Non-toxic, Impact resistant, Lightweight

Applications

Suitable Industries

- Medical apparatus and instruments
- Food industry
- Oil and gas
- Chemical industry
- Military
- Electric power
- Electronics
