Product Overview

Professional Non-Magnetic Solution

This non-magnetic combination wrench is engineered for specialized environments where magnetic interference must be avoided. Constructed from high-grade stainless steel, it maintains structural integrity and toughness across extreme temperature ranges, from -250 °C to 600 °C. Its design ensures no pollution and no radiation, making it an environmentally conscious choice for sensitive industrial applications.

Technical Specifications

Operating Temperature Range

-250 °C

Minimum Temperature

600 °C

Maximum Temperature

Available Size Range

6mm - 46mm

Material

Non-magnetic stainless steel

Key Features

Key Attributes

Non-magnetic, Corrosion Resistant, High Toughness, Eco-friendly, No Radiation

Design Details

Wrench Configuration

- Open-end wrench
- Box-end wrench
- 12-point box-end design
