

Non-Motorized Passenger Tricycle

This tricycle is designed for passenger transport over short distances. It features a three-wheel configuration, enclosed passenger compartment, and an open driver's seat.

Overview

Eco-Friendly Passenger Transport

The C23 non-motorized passenger tricycle offers a practical, human-powered solution for short-distance urban or campus transportation. Designed with a sturdy frame and an enclosed passenger compartment, it ensures rider comfort and protection from the elements. This vehicle is an excellent choice for businesses looking for efficient, zero-emission shuttle options.
