

Non-Pressurized Solar Water Heater Collector

This non-pressurized solar collector is designed for water heating. Evacuated tube technology ensures optimal heat absorption and minimal heat loss.

Product Overview

High-Efficiency Solar Heating Solution

This non-pressure solar collector is engineered for both residential and commercial water heating applications, offering a reliable and cost-effective energy solution. By utilizing advanced evacuated tube technology, the system ensures optimal heat absorption while minimizing thermal loss. Its durable construction is designed for longevity, and the straightforward installation process makes it an ideal choice for sustainable energy integration.

Technical Features

Technology	Evacuated tube collector
System Type	Non-pressurized

Key Benefits

Performance Highlights

- High-efficiency heat absorption
- Minimal heat loss design
- Durable construction
- Easy installation

Suitable Applications	Residential, Commercial
