

Non-Sparking Adjustable Valve Wrench, 300-900mm

This non-sparking wrench is essential for safe operation in environments with potential explosion risks, such as chemical plants and oil refineries. It is also suitable for machinery manufacturing and maintenance.

Product Overview

Non-Sparking Adjustable Valve Wrench

This non-sparking adjustable valve wrench is engineered for safe operation in hazardous environments, such as those with flammable gases or explosive atmospheres. With a versatile size range of 300-900mm, it provides essential utility for industries including chemical processing, power generation, mining, and railroads. The tool is designed to prevent sparks during impact, friction, or collision, ensuring operational safety in sensitive work zones.

Technical Specifications

Size Range	300-900mm
Face Hardness	25 HRC
Tensile Strength	80 kgf/mm ²

Certifications & Compliance

Certifications	ISO9001, UKSA
----------------	---------------

Application & Usage

Applicable Industries

- Chemical Industry
- Power Generation
- Railroad
- Mining
- Petroleum Industry

Safety Features

Non-Sparking • Anti-Magnetic • Explosion-Proof
