

Non-Sparking Aluminum Bronze Double C-Type Wrench

This non-sparking wrench is manufactured from aluminum bronze, preventing sparks in potentially explosive atmospheres. It is widely used in industries such as petroleum, chemical processing, power generation, railroad, and mining.

Product Overview

Safety-First Engineering

This double C-type wrench is expertly crafted from high-grade aluminum bronze alloy, specifically engineered for use in hazardous environments. Designed to prevent sparks during impact or friction, it is an essential tool for high-risk sectors such as petroleum, chemical processing, and mining. Its robust construction ensures reliable performance even in the presence of flammable vapors or explosive atmospheres.

Material & Construction

Material	Aluminum Bronze Alloy
Manufacturing Technique	Casting or Forging
Surface Treatment	Mirror Polished

Certifications & Standards

Certifications	ISO9001, UKAS, SGS, ROHS, CE
----------------	------------------------------

Applications

Target Industries

- Petroleum Industry
- Chemical Industry
- Power Generation
- Railroad
- Mining

Key Features

Safety Capabilities

Non-Sparking • Explosion-Proof

Market

Primary Markets

- Europe
- Middle East
- Southeast Asia
