

Non-Sparking Aluminum Bronze Wrenches

These non-sparking wrenches are made from a durable aluminum bronze alloy. They are designed for use in environments where flammable or explosive materials are present.

Product Overview

Non-Sparking Aluminum Bronze Wrenches

These wrenches are precision-crafted from a specialized aluminum bronze alloy, specifically engineered for use in high-risk environments where flammable or explosive materials are present. The non-sparking properties ensure safety during critical maintenance tasks, while the robust alloy construction offers excellent corrosion resistance and long-term durability. Designed with versatility in mind, each tool features both open-end and box-end configurations to handle a wide range of fastening applications.

Technical Specifications

Available Sizes

- 27

Material	Aluminum Bronze Alloy
Key Features	Non-Sparking, Corrosion Resistant, Durable Construction
Design	Combination Wrench (Open-end and Box-end)

Safety & Compliance

Safety Certification

Non-Sparking Certified

Ideal Environments

- Flammable environments
- Explosive atmospheres
- Hazardous industrial sites
