

Non-Sparking Axe Hammer and Mallet Set

This set includes non-sparking axes, hammers, and mallets. Constructed from aluminum copper or beryllium copper, these tools are suitable for use in environments where sparks could ignite flammable materials.

Overview

Professional Non-Sparking Tool Set

This professional-grade non-sparking tool set, including axes, hammers, and mallets, is engineered for safety in hazardous environments. Designed to effectively prevent sparks, these tools are essential for high-risk industries such as petroleum, chemical processing, power generation, and mining. Available in durable aluminum-bronze or beryllium-bronze alloys, they offer high tensile strength and long service life.

Technical Specifications

Material Performance Comparison

Property	Aluminum-Bronze	Beryllium-Bronze
Hardness	25 HRC	35 HRC
Tensile Strength	75-85 kgf/mm	105-120 kgf/mm

Available Colors	Natural, Green
Size Options	Customized

Certifications & Quality

Standards Compliance

ISO 9001 • UKAS Certified

Key Features

- Spark-prevention technology
- High durability
- Long use-life
- Customizable manufacturing

Applications

Suitable Industries	Petroleum, Chemical, Power Generation, Railroad, Mining
