

Non-Sparking Beryllium Bronze Combination Pliers

These non-sparking pliers are made from beryllium bronze alloy for safe use in potentially explosive environments. They are designed for holding, bending, cutting, and stripping wires and metal parts.

Product Overview

Professional Non-Sparking Combination Pliers

These combination pliers are engineered from high-grade Beryllium Bronze (Be-Cu) to provide essential safety in hazardous, explosive, or flammable environments. Designed for versatility, they are ideal for holding, bending, and cutting wires, pipes, and metal sheets. Their non-sparking and antimagnetic properties make them a critical tool for professionals in the petrochemical, mining, and power industries.

Technical Specifications

Available Sizes

- 150 mm
- 175 mm
- 200 mm
- 250 mm

Material	Beryllium Bronze (Be-Cu)
Compliance Standards	GB10686-2013, ISO9001:2008

Key Features

Safety Characteristics

Non-Sparking • Antimagnetic • Explosion-Proof

Recommended Industries	Petroleum, Petrochemical, Mining, Natural Gas, Power Generation, Pharmaceutical
