

Non-Sparking Beryllium Bronze Pipe Wrench

This pipe wrench is constructed from a beryllium bronze alloy. It is designed to be non-sparking, explosion-proof, and anti-magnetic.

Product Overview

Safety-Critical Tooling

This non-sparking pipe wrench is engineered from high-grade beryllium bronze alloy, specifically designed for hazardous environments where combustible vapors, liquids, gases, or dusts are present. It effectively eliminates the risk of sparks during impact, collision, or friction, making it an essential safety tool for high-risk industries. The wrench features an adjustable jaw design, providing versatility for various pipe sizes in demanding operational settings.

Technical Specifications

Material Composition	Beryllium Bronze Alloy, Aluminum Bronze Alloy
Length	200 mm

Safety & Compliance

Safety Features

Non-Sparking • Explosion-Proof • Anti-Magnetic

Certifications

- ISO 9001
- UKAS

Applications

Common Industry Applications

- Petroleum Industry
- Power Generation
- Railroad
- Mining
- Oil Refineries
- Chemical Plants
