Product Overview

Safety-First Design

This non-sparking brass shovel is engineered specifically for high-risk environments where flammable or explosive materials are present. Constructed from solid brass, the blade eliminates the risk of spark generation during use, making it an essential tool for chemical plants, oil refineries, and mining operations. The durable wooden handle, paired with a comfortable D-grip, ensures both longevity and user comfort during demanding tasks.

Key Features

Materials

- Solid Brass Blade
- Durable Wooden Handle
- Red Plastic Grip

Safety Capabilities

Non-Sparking, Explosion-Proof, Hazardous Environment Ready

Specifications

Recommended Industries

Oil & Gas • Chemical Processing • Mining

Design Highlights

- Square blade design
- D-grip handle for control
- Red plastic grip for visibility
