

Non-Sparking Brass Sledge Hammer

This heavy-duty sledge hammer features a non-sparking brass head, making it suitable for use where flammable materials are present. It is designed to strike hardened materials without causing sparks, offering a safe and reliable option for industrial applications.

Product Overview

Non-Sparking Sledge Hammer

This heavy-duty sledge hammer is engineered with a specialized non-sparking brass head, making it an essential safety tool for environments where flammable materials are present. Designed for industrial applications, it allows for striking hardened materials without the risk of creating sparks. The tool features a durable handle with an ergonomic grip to withstand rigorous use while minimizing user fatigue.

Key Features

Suitable Environments

- Environments with flammable materials
- Industrial striking applications
- Hardened material impact tasks

Safety Characteristics

Non-Sparking, Industrial Grade, Heavy-Duty

Head Material

Brass
