

Non-Sparking Bung Wrench and Hex Key Set

This multi-function tool set includes non-sparking wrenches and hex keys. It is designed for use in environments with flammable vapors, liquids, gases, and dusts, preventing sparks during operation.

Overview

Non-Sparking Safety Tools

These non-sparking bung wrenches are engineered for use in hazardous environments where flammable vapors, liquids, gases, or dusts are present, such as in the chemical, petroleum, and mining industries. Designed to prevent ignition risks during striking or collision, these tools are available in high-quality Beryllium Copper or Aluminum Bronze alloys. They provide a critical safety solution for professionals working in explosive atmospheres.
