

Non-Sparking Bung Wrench for Drum Plugs

This non-sparking bung wrench is designed for opening and closing drum plugs in hazardous environments. It is made from copper alloy to prevent sparks during operation.

Overview

Safety-First Design

This non-sparking bung wrench is engineered for use in hazardous environments where flammable vapors, liquids, gases, or dust are present. Essential for industries like petroleum, chemical, and mining, it prevents dangerous sparks during operation. Available in Beryllium Copper or Aluminum Bronze, this tool ensures safety and reliability when working in explosive atmospheres.

Technical Specifications

Hardness Rating

25 HRC

Aluminum Bronze

35 HRC

Beryllium Copper

Tensile Strength Range

Material	Strength
Aluminum Bronze	75-85 kgf/mm
Beryllium Copper	105-120 kgf/mm

Available Lengths

- 300
- 350

Color

Natural • Green

Available Materials

Aluminum Bronze, Beryllium Copper

Compliance & Usage

Typical Industries

- Petroleum Industry
- Chemical Industry
- Power Generation
- Railroad
- Mining

Certifications

ISO 9001, UKAS
