

Non-Sparking Center Punch

This tool is essential for use in potentially explosive environments such as petroleum, chemical, and natural gas industries. It is also suitable for machinery manufacturing and mechanical maintenance.

Product Overview

Safety-Critical Center Punch

This non-sparking center punch is engineered for high-risk environments where flammable vapors or explosive atmospheres are present. Constructed from specialized non-ferrous alloys, it prevents dangerous sparking during strikes, collisions, or friction. It is a reliable tool for precision marking in demanding industries such as petroleum, chemical processing, and mining.

Technical Specifications

Available Lengths

- 100mm
- 500mm

Material Composition

Aluminum Copper Alloy, Beryllium Copper Alloy

Surface Finish

Mirror Polished

Compliance & Quality

Certifications

ISO9001 • UKAS • CE • ROHS

Usage & Application

Industries Served

- Petroleum Industry
- Chemical Industry
- Power Generation
- Railroad
- Mining

Compatible Materials

Metal, Wood, Plastic
