Product Overview

Professional Non-Sparking Tool

This non-sparking short handle spoon is engineered for safety in high-risk environments where flammable vapors, gases, or dust are present. Crafted from a specialized copper-beryllium alloy, it provides essential protection against accidental ignition while offering non-magnetic and rust-resistant properties. Its compact design ensures precise control and maneuverability, making it an ideal tool for critical operations in petrochemical, mining, and aerospace industries.

Material Composition

Material Composition

Element	Percentage
Beryllium (Be)	1.8% - 2%
Nickel (Ni)	0.1% - 0.6%
Copper (Cu)	Rest
Others	< 0.6%

Technical Specifications

Hardness	HB283-365
Breaking Strength	112.5 kgf/mm ²

Key Characteristics

Features

Spark Proof • Non-magnetic • Rust resistant

Applications

Suitable Industries

- Petrochemicals
- Mining
- Aerospace
- Pharmaceutical
- Shipyards
- Laboratories
- Desalination plants
