

Non-Sparking Double Open End Wrench

This non-sparking wrench is designed for use in hazardous environments. It is suitable for industries where flammable vapors, liquids, or dust are present, preventing sparks when struck or rubbed against other objects.

Product Overview

Safety-Critical Design

These non-sparking double open-end wrenches are engineered specifically for hazardous environments where flammable vapors, liquids, gases, or dusts are present. By preventing ignition sparks during striking, rubbing, or collision, they provide essential safety for professionals in the petroleum, chemical, power generation, and mining sectors. Available in Beryllium Copper or Aluminum Bronze, these tools are built for reliability and safety in explosive atmospheres.
