

Non-Sparking Drum Bung Wrench

This non-sparking wrench is designed for opening and closing oil drum bungs in hazardous environments. It is made from a non-sparking alloy to prevent ignition.

Product Overview

Safety-First Drum Bung Wrench

This non-sparking oil bung wrench is engineered for safe operation in hazardous environments where flammable materials are present. Constructed from a specialized aluminum-bronze alloy, it effectively eliminates the risk of ignition during the opening and closing of drum bungs. Its robust design ensures reliable performance in demanding industrial settings such as oil refineries and chemical plants.

Technical Specifications

Material	Aluminum Bronze Alloy
Safety Properties	Non-Sparking

Compliance & Logistics

Certifications	ISO 9001:2008
Delivery Policy	Timely delivery
