

# Non-Sparking Flat Nose Pliers

These 6-inch flat nose pliers are constructed from non-sparking beryllium copper. They are designed for gripping, bending, and cutting wires and small components in hazardous environments.

## Product Overview

### Safety-First Precision Tools

These non-sparking flat nose pliers are precision-engineered for safe operation in hazardous environments where flammable or explosive materials are present. Crafted from high-quality Beryllium Copper (BeCu) or Aluminum Copper (Al-Cu) alloys, they effectively eliminate the risk of sparks during use. Designed for gripping, bending, and manipulating small components, these tools are an essential safety asset for oil refineries, chemical plants, and industrial maintenance teams.

## Technical Specifications

### Available Sizes

- 150
- 200

Material Composition	Be-Cu, Al-Cu
Manufacturing Process	Die forged
Measurement Unit	mm

## Key Features

### Safety Certifications

Non-Sparking • Hazardous Environment Rated
