

# Non-Sparking Locking Pliers

These non-sparking locking pliers are designed for use in environments where flammable or explosive materials are present. The locking mechanism allows for hands-free operation, providing a secure grip on workpieces.

## Product Overview

### Safety-First Design

These non-sparking locking pliers are engineered specifically for hazardous environments where flammable or explosive materials are present. Constructed from specialized alloys, they effectively prevent spark generation, significantly reducing ignition risks in sensitive areas like oil refineries and chemical plants. The integrated locking mechanism provides a secure, hands-free grip, while the adjustable jaws and ergonomic handle ensure versatility and comfort during demanding tasks.

## Key Features

### Operational Benefits

- Hands-free locking mechanism
- Adjustable jaw capacity
- Ergonomic handle design

### Safety Features

Non-Sparking, Explosion-Proof, Hazardous Environment Rated

## Applications

### Recommended Industries

Oil & Gas • Chemical Processing • Hazardous Locations
