

Non-Sparking Putty Knife

This putty knife is designed for use in environments where flammable materials are present. It is made from non-sparking materials such as aluminum bronze or beryllium copper.

Product Overview

Professional Non-Sparking Putty Knife

This non-sparking putty knife is engineered for safe operation in hazardous environments where flammable vapors or combustible materials are present. Featuring a durable brass blade and an ergonomic wooden handle, it provides reliable performance for spreading and smoothing applications. It is an essential tool for industries requiring strict safety compliance, such as petrochemical, aerospace, and pharmaceutical manufacturing.

Key Features

Suitable Industries

Petrochemicals, Fireworks Industry, Mines, Refineries, Chemical Industry, Defense, Gas & Oil, Flour Silos, Power Stations, Breweries, Navy, Paint Manufacturing, Alcohol Processing, Weapon Fabrication, Plastic Manufacturing, Distilleries, Aerospace, Pharmaceutical, Fire-Fighters, Automotive
