

# Non-Sparking Round Point Shovel with Wooden Handle

This non-sparking shovel is designed for use where flammable or explosive materials may be present. The round point design of the shovel allows for easy penetration into various soil types.

## ADDITIONAL IMAGES

## Product Overview

### Safety-First Excavation Tool

This non-sparking round point shovel is engineered for safe operation in hazardous environments where flammable or explosive materials are present. Constructed from specialized non-ferrous alloys, it effectively prevents the generation of sparks during use, significantly reducing ignition risks. Featuring a durable blade and a sturdy wooden handle, this tool provides both reliability and comfort for demanding industrial tasks.

## Technical Specifications

Material Composition	Aluminum-Bronze, Beryllium-Bronze
Manufacturing Technique	Casting or Forging
Surface Treatment	Mirror Polished

## Compliance & Standards

### Certifications

ISO 9001 • UKAS • CE • SGS • ROHS

## Applications

### Suitable Industries

- Petroleum
- Chemical Industry
- Power Generation
- Railway
- Mining

## Market Reach

### Primary Markets

- Europe
- Middle East
- Southeast Asia
