

Non-Sparking Safety Scissors

These non-sparking scissors are made from aluminum bronze or beryllium copper. Forged for durability, they are designed for use in environments where sparks could pose a risk.

Product Overview

Safety-Critical Cutting Solution

These non-sparking safety scissors are precision-engineered for use in hazardous environments where flammable vapors or explosive materials are present. Constructed from specialized non-ferrous alloys, they effectively eliminate the risk of mechanical sparks during operation. They are an essential tool for maintaining safety protocols in high-risk industries such as petrochemicals, mining, and aerospace.

Safety & Compliance

Industry Applications

- Petrochemicals
- Fireworks Industry
- Mines
- Refineries
- Chemical Industry
- Defense
- Gas & Oil Pipelines
- Flour Silos and Mills
- Air Forces
- Power Stations
- Breweries
- Navy
- Paint Manufacturing
- Alcohol Processing
- Weapon & Ammunition Fabrication
- Plastic Manufacturing
- Distilleries
- Aerospace Industry
- Pharmaceutical Industry
- Fire-Fighters
- Automobile Industry

Technical Details

Material Type	Non-ferrous metal, Brass, Bronze, Copper alloy
Spark Prevention	Yes
